DETAILED ACTION

Claims 27-35, 37 and 38 are pending.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/25/2008 has been entered.

Response to Amendment

Applicant's amendment and response filed on 11/25/2008 has been received and entered into the case.

Claims 1-26 and 36 have been canceled, claims 27-25 have been withdrawn from consideration as being drawn to non-elected subject matter, and claims 37 and 38 have been considered on the merits. All arguments have been fully considered.

The claim rejection under 35 U.S.C. §103 has been withdrawn due to the amendment.

Specification

The disclosure is objected to because of the following informalities: The specification (p.47) discloses nucleotide sequences corresponding to SEQ ID NO:3 and NO:4 in the sequence listing. However, the sequences are not labeled with the corresponding SEQ ID NOs.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 37 and 38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The newly introduced term of "truncated" in the claims raises a new matter issue to the current application. The specification does not provide adequate support for the limitation, and thus, the limitation "truncated murine Fuc-TVII enzyme" is considered a new matter.

Applicant is advised to use the term "recombinant" as in the specification.

Conclusion

No claims are allowed.
